To whom it may concern

Euphrosyne Polotskaya State University of Polotsk has been developing its educational traditions since 1581 and now highly ranks among the leading institutions of the Republic of Belarus. It is a scientific, cultural, information and educational centre of the region, a driver of its economic growth. As our University is located at the heart of Belarusian petrochemistry and it is the only higher educational institution in Belarus, training specialists for the petrochemical industry of both our and foreign countries. The University is also a member of Novopolotsk Innovation and Industrial Petrochemical Cluster. It is a union of Novopolotsk City Executive Committee and oil-refinery plant “Naftan”.

One of our goals is to further develop our academic profile on the international educational arena. We successfully cooperate with more than 180 universities across the world and we are continuously expanding the geography of our collaboration. Euphrosyne Polotskaya State University of Polotsk also realises its educational potential through joint teaching programmes with universities in the Republic of Uzbekistan, the Republic of Tajikistan and the People's Republic of China. Our University has a deep interest in establishing close ties with Nigerian educational institution and recruiting agencies.

Euphrosyne Polotskaya State University of Polotsk has a solid and modern technical base and creates laboratories in a wide range of areas. There are 24 scientific and innovative laboratories with 11 in the field of Information Technologies and Electronics, 4 in the field of Energy Resources Processing and Transportation, 5 in the field of Civil Engineering and Mechanics and Technology, 4 in the field of Humanities Research.

Today the University trains more than 6,000 undergraduate, graduate and postgraduate students including international students from 17 countries. The training is carried out in the following areas Information Technologies and Radio Electronics, Economics and Law, Civil and Mechanical Engineering, Water Supply,

Water Disposal Systems and Water Conservation, Heat and Gas Supply, Ventilation and Air Protection, Geodesy and Cadastres, Foreign Languages and Literature, Social Science and Psychology.

The University has 7 Research Schools headed by the leading Doctors of Sciences (<https://www.psu.by/en/university/research-schools>):

- Research School in the Field of Mobile Development of Machine Building Industry;

- Research School in the Field of Historical and Contextual Approach to World Literature Studies;

- Research School in the Field of Assessment of Technical Conditions and Reinforcement of Building Construction;

- Research School in the Field of Theory and Practice of Information Security;

- Research School in the Field of History and Anthropology of the Dvina River Region;

- Research School in the Field of Maintenance and Renovation of Vehicles;

- Research School in the Field of Local Atmosphere Regeneration.

The University holds an online course in the Russian language as a foreign one and international summer schools in different aspects of the Russian language, Belarusian language and culture, Economics, Law and Information Technologies.

Additionally, we offer you to get acquainted with the specialities and opportunities of our University in more detail following the links:

- admission rules for international students (<https://www.psu.by/en/foreign-citizens>);

- preparatory courses for international students wishing to study at Euphrosyne Polotskaya State University of Polotsk (<https://www.psu.by/en/university/pre-university-training>);

- Bachelor's Degree Programmes (<https://www.psu.by/en/university/bachelor-studies>);

- Master's Degree Programmes (<https://www.psu.by/en/university/master-s-programmes>).

We would like to propose the following areas of collaboration with universities in the Federal Republic of Nigeria:

- participation and organisation of joint scientific seminars, conferences, round tables in various fields of research (including on-line events);

- implementation of joint projects in science and education;

- exchange of experience in introducing advanced educational technologies and teaching methods;

- academic exchange of staff and students;

- summer schools.

At the same time, could I express my confidence that the list of areas for cooperation is not exhaustive, and, therefore, can be extended on both sides. We are confident that the development of cooperation will be mutually beneficial and will enhance further development of the regions and countries.

If you have any further questions, please do not hesitate to contact us:
